Need, Intended Audience, and Scope of Practice

This symposium is designed for electrophysiologists, cardiologists, fellows in training, scientists and others interested in cardiac arrhythmias. Presentations will include the latest results of basic and clinical research, as well as current developments in ablation, imaging and device technologies and therapies. Features include: interactive discussions, case presentations, expert panels and NEW this year – Poster Presentation.

Internationally known faculty and always up-to-the-minute topics have made this one of the top five EP conferences in the United States.

Learning Objectives

Following the symposium, the participants will be able to:

- Describe and discuss the mechanisms of AF, VT, and VF
- Critically analyze current and future therapies, including ablation for AF, VT and VF
- Discuss the value of new technologies in arrhythmia management

Chicago Attractions

Shopping: The Magnificent Mile, a block away, offers hundreds of top retailers including four separate shopping centers. Chicago has it all, from high-end retailers to discount merchandise.

Theatre: In Chicago's theatre scene, you'll find everything from traveling Broadway megahits and experimental theatre to famous improvisational groups that display the wit and humor of the Second City.

Museums: The Museum of Contemporary Art is within walking distance from the hotel. A ten-minute cab ride will take you

to the Museum of Science & Industry or the Haydn Planetarium.

John Hancock Building: Enjoy a cocktail 96 stories above the city only three blocks from the hotel.

Dining: With its widely diverse neighborhoods and strong love for food, you'll find unlimited culinary adventures whether you're in the mood for deep dish pizza, funky eclectic or a fancier night out – Chicago has more five diamond restaurants than any other city in the nation.
