Advanced Topics in OB/GYN Ultrasound 2026

March 26th - 27th, 2026

Sanger Heart & Vascular Institute 1237 Harding Pl, Charlotte, NC & via Webinar

Are you an obstetrician and gynecologist, radiologist, sonographer, physician assistant, nurse practitioner, resident, or fellow looking to enhance your expertise in obstetric and gynecological ultrasound?

Join us at this premier conference to learn from leading experts in Obstetric and Gynecologic Ultrasound. Designed to elevate your clinical practice, this event will provide valuable insights on recognizing fetal anomalies, placental disorders, gynecologic abnormalities, adnexal masses and much more.

This conference is a must attend for anyone who wants to stay up to date on the best practices and evidence-based standards in ultrasound diagnosis and management.

Objectives:

- **Identify** normal fetal anatomy and biometry to perform accurate ultrasound measurements and assess fetal growth.
- **Analyze** ultrasound findings of fetal anomalies involving the cardiac, central nervous system, gastrointestinal and renal systems and formulate a differential diagnosis.
- **Assess** ultrasound findings of abnormal gynecologic anatomy, including uterine leiomyoma, adenomyosis, endometriosis, and cesarean scar niche.
- **Evaluate** ultrasound findings of adnexal masses and use appropriate risk stratification systems.
- **Develop** proficiency in sonographic techniques for early pregnancy evaluation
- **Apply** standardized terminology and lexicon in ultrasound reporting and communication.
